Music by choir.

### Baby Clinic in Champion June 22nd

The Public Health nurse, Miss Lansdale, is being sent by the Dept. of Health of Alberta to conduct a baby clinic in Champion on June 22nd from 10:00 a.m. to 12:00 noon. All children of preschool age (under 5) will be examined free of charge, and advice will be given the parent as to care, feeding, etc.

This clinic will be held in the home of Mrs. U. S. Alexander, Mrs. (Rev.) Peter Dawson is convener of the committee in charge and Mrs. Ulrich and Mrs. Johnson have kindly promised to assist Miss Lansdale.

It is to be hoped that all who possibly can will take advantage of the opportunity of having this experienced lady advise them.

### Local & General

Men! Change your head gear to lighter caps, as low as 35¢ each at Campbell's.

Mrs. Ted Davis of Magrath, was a weekend visitor in town recently.

Mrs. Ted Davis of Magrath, left Saturday for their home in Ashland, Oregon, Friday of last week.

Dr. H. N. Heal is driving a new Essex Terraplane.

Mrs. Root, who severely hurt her foot when a buggy seat fell on it, left Tuesday for Calgary for an x-ray.

New Carrots, Fresh Lettuces, Tomatoes, cucumbers at Campbell's.

Mrs. Towers of Calgary, sister of Mrs. Peter Dawson, is a visitor at the parsonage.

Mrs. Nelson, who recently located in Vulcan with her husband, left Friday for Vancouver, where she will visit her brother.

Mr. and Mrs. Martin Dawson left Sunday for their home in Edmonton, having spent the weekend visiting with Miss Ella Beaubien.

Always on ice, fresh and appetizing Swifts baked Ham, Bologna, Spiced Ham, and everything else good to eat at Campbell's.

Mrs. J. M. Moffatt spent a few days this past weekend in Cardston, west at the home of Mr. and Mrs. W. G. Laidlaw.

C. Dessen, of the Canadian Bank of Commerce staff, left Monday on a two week's vacation.

The grounds surrounding the Catholic church have been ploughed in preparation for trees and shrubs, which will be planted in the near future.

Charlie Sutton was host to a number of children in town on Thursday, when he provided conveyance to the circus. Three cheers for Charlie!

Mrs. J. Roebuck of Lethbridge, left this week on an extended trip to the eastern states.

Miss Elsie McLean, having completed her training at the Calgary Normal School, returned to her home last week.

Mr. and Mrs. J. D. Henderson have as their guests this week, Miss Mary Henderson and Jack Lynn of Provost.

Fresh Raspberries, Strawberries, Plums, Bananas, Rhubarb, at Campbell's.

New shades Kayser House, new White Shoes, waiting for you at Campbell's.

### School Clinic Report

The School Clinic, which was held the last week in May, passed off successfully. A special feature was the fact that about twenty parents took advantage of the opportunity to consult with Dr. Freeze regarding the health of their children. We should like to see the number of parents attending the clinic increase from year to year. Without their presence the check-up cannot be as satisfactory.

Defects were found as follows: Deformed tonsils and adenoids, 20; diseased tonsils, 6; tonsils doubtful, 2; enlarged glands, 1; anemic, 3; probable diseased appendix, 1; defective vision, 34 (of those a number already were wearing glasses but needed them changed).

Many cases of underweight were reported, but in the majority of cases this condition coincided with, and was evidently caused by diseased tonsils and adenoids.

Others are suspected due to Dr. Freeze for his heavy cold operation. The committee in charge would like also to express their hearty appreciation of the many willing assistants who helped to make the clinic to proceed smoothly and rapidly. These included Mrs. Johnson, Mrs. Lamont, Mrs. Henderson, Mrs. Alexander, Mrs. McLean, Mrs. Stephenson, Mrs. A. Baker, Mrs. Bond, Mrs. McIntyre, Mrs. Clever, Mrs. M. Clever. We are also grateful to Mr. Campbell for the loan of his scales for this occasion.

### June Meeting Women's Institute

The June meeting of the Champion W.I. was held in the home of Mrs. McLean. After the reports on the bake sale, \$9.40 net, and the school clinic, \$1.00, were read over and we had a joy that the fare to which we were invited had been postponed until fall. This is to be at the home of Mrs. Martin. They have a market garden, orchard and vineyard, and in Sept. or Oct. is really more enticing than in June when nothing much is ripe.

While on the subject of picnics our next meeting will be an ice cream social in the home of Mrs. Martin.

Mrs. Hageman, our Constituency Convener there addressed and after some general hints about the constituency conference in Banff she also gave a most delightful address on "A few essentials for a successful life." A successful life was like a big family where the father was working, the mother ambitious, the sons and daughters different attributes and interests.

After the address Mrs. Ulrich took charge of the meeting. She is chairman of the Canadian Industries Committee and gave us a most skillful and interesting exposition of the subject.

Then to round it out and make it all perfect, Mrs. Ulrich served a most delicious tea and among the members and guests we had some A-1 cup readers.

Amid flying summerfall Champion ball club lost to the Arrowwood nine in Arrowwood on Monday, June 11th, by a score of 18-6. Apparently the Champion players have not used to dust and wind yet. The weather was very poor, the game being called for 30 minutes after the firstinning.

Luchin, Ferguson and Watts were the battery for Champion. Fox 16, Bouzing 26, Steeves 36, Shantz 36, Hamilton 16, Ferguson 16, Anderson 16.

The absence of the High School players was noticed, both in fielding and at the bat.

## Champion Theatre

Wednesday, June 20th

## The Strangers Return

With Lionel Barrymore and Miriam Hopkins

The story of a wheat farmer and Lionel Barrymore as Farmer Ster could and does live right here in Champion. A Super Special for the whole family.

Wed. June 20th      Show at 8.30

## Quick Relief Now From Neuralgia

**Real ASPIRIN Starts Taking Hold in Few Minutes**

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia...the fastest safe relief.

These results are due to a scientific discovery by an Aspirin Tablet, beginning to disintegrate in the amazing space of a few minutes after taking it. And hence to "take hold" of pain a few minutes after taking it tells the story. An Aspirin Tablet starts to disintegrate almost instantaneously and you are ready to go to work almost instantly.

When you buy, though, be on guard. You can't tell if you get ASPIRIN's quick relief, be sure the name is Bay in the form of a cross is on every tablet of Aspirin.

**Does Not Harm the Heart**

### Gold Still Is King

The lure of gold continues to exercise its sway upon the minds of men. Countries may go off the gold standard. New economists may argue as they will, against gold as a monetary basis. Despite all the arguments "gold is still king," and the world's governments, seeking a safe haven, turn to handshakes and dagger in their quest, inculping man to undertake hazardous expeditions to win it, inducing countries to exert desperate efforts to acquire it. Mirage or otherwise, it gilds the horizon of new prophet and old priest, of port and prawn, of rich and poor, of commoner and peer. Phantasm or reality—gold still is King.

These somewhat wretched plautines are caused by the recent appearance of two new "gold" on the market on which strangely enough were placed in close proximity. The one headed: "National Bank of Scrambling for Gold"; and the other "\$30,000,000 Buried by Pirates Caught." The one article demonstrates the hold which the gold tradition has upon world statesmen; the other epitomizes the ingenuity and risk employed and undertaken in efforts to win the precious metal—a gamble with life and money.

Relative to the international scramble, it is stated that Britain and other non-gold-standard countries, including the United States, of course, are buying gold wherever it can be bought, and that their accumulations of gold now break all previous records.

Replying to the question why the United States continues to purchase gold, the New York Times recently replied that, in principle at least, gold still remained the world's monetary standard. Continuing it said:

"No government is shaping its monetary policies in line with the dreams of the imaginative New School Economists. Every government is recognizing the importance of gold as a standard of value and as a means of national valuation. Nothing has shown this underlying sentiment more clearly than the fact that every nation—even those which have suspended gold—has been returning to it again and again. The same is true of the issues as scrupulously as it did half a dozen years ago. Whereas the Bank of England, at the beginning of 1933, held the smallest gold reserves in more than 100 years, it now holds the largest, exceeding \$1,000,000,000, adding the reserve to the highest figure in its history. The general process is indirect redefinition of the gold standard. The possession of adequate amounts of gold is the guarantee that the dollar will remain stable and that ever return of sound international conditions should make return to sound stability a possibility."

The above story is somewhat similar to the famous Coco Island treasure story, which, according to a popular expedition to Taitung in the south Pacific, to recover approximately \$30,000,000 in gold coins and a fortune in jewels, said to have been buried by pirates in or about 1840. Usually such treasure hunts originate with discovery, in some peculiar manner, of a map of the cache. Such a map was introduced in his "Treasure Island"; such a map as allegedly had been found tattooed on the chest of some old sailor in some Barbary Coast "dive." In this particular case the cache was discovered possession of a certain Mr. H. C. who, it is said, visited the island and succeeded in removing some of the jewels. These, he subsequently buried—a peculiar enough action for which no reason is given. However, in March, 1934, the same gentleman claims to have located the treasure at the exact point indicated by the map. Speaking of the discovery, he says:

"There are only two things to contend with in drilling for the lost sand and coral. The first is to drill down through the ground in the way through the coral and sand and reach the gold. There is no rock on the beach and by the drifts, we felt the shape of the Ingots and also are able to determine the extent of the treasure. The drifts spin on gold just as a top would on a minute floor.

It is upon such evidence and such representations, apparently, that hard-headed British engineers and business men are prepared to risk their money, and expend their enterprise.

#### Flotam And Jetson

Goods lost at sea and found floating are called flosfams. Goods thrown overboard, petrified, during a storm, or washed up from a wreck are called jetsons.

They do not belong to the finder, even if he cannot trace the owner. They must be handed over to the Crown, and part of their value is paid in compensation.

#### More Than Satisfied

He had bought a barometer, and a fortnight later the instrument maker from whom he bought it passed the barometer to him.

"Well, are you satisfied with the barometer?" asked the instrument maker.

"Rather!" said the owner. "I have had it a fortnight, and we have had fine weather all the time."

#### The Great Zambezi Bridge

##### Remarkable Feat of Engineering In Heart Of Rhodesia

Spanning the Zambezi Gorge stands one of the highest bridges in the world.

This bridge is in the heart of Rhodesia, far from civilization and so near to the great Victoria Falls that trains crossing the bridge are sometimes held up by spray from the turbulent water. The building of the Zambezi Bridge was a remarkable feat of engineering. First of all a rocket had to be fired across the rocky chasm. The rocket was attached to a line, which in turn was fastened to a length of wire and a steel rod.

During the construction of the bridge the builders worked at a dizzy height over the swirling waters below.

When workers began their task a long net was spread beneath them to prevent catastrophe should any of them lose their balance.

But instead of steadying their nerves they complained of vertigo, seeing the constant reminder of their perilous position, and it had to be removed. After a period of little more than six months the bridge was completed and a train was driven across to test its strength.

The structure was painted grey so that whenever the materials rested in any part the defect would immediately be noticed. This impressive feat of engineering in the wilds in no way detracts from the beauty of the scenery.

#### Harbor Expert Dead

##### Sir Frederick Palmer Who Recommended Irrigation Was Notes

News reached Canada recently of the death at Lingfield, near London, England, of Sir Frederick Palmer, the man whose recommendation caused Churchill to be developed as Western Canada's northern sea outlet.

When Hon. C. A. Dunning assumed the portfolio of minister of railways in the Dominion cabinet in 1926, he sent to England for Sir Frederick Palmer of Britain's most noted engineers.

Sir Frederick went into the northland and after an extensive investigation, recommended to Mr. Dunning that the northern port of Churchill be developed on behalf of Western Canada via the sea.

For many years Sir Frederick was chairman of the board of governors of the University of London Authority. He served as consulting engineer for many railways both in the old country and India, in addition to being engineer of the Calcutta port. In 1929 he was named engineer of the new \$62,000,000 Charing Cross bridge, London.

#### Recipe for Iced Tea

Use six heaping teaspoons of Ceylon Ceylon Tea. Brew tea in a pint of fresh boiled water for six minutes. Strain, and pour liquid into a two quart container. While tea is cooling add sugar, lemon juice and juice of two lemons. Shake or stir content well, until sugar is dissolved. Add cold water, ice cubes and cold water. Do not allow tea to cool before adding the cold water, otherwise liquid will become watery. Serve tea hot or cold, as desired. The above will make two quarts of iced tea, or seven tall glasses with chipped ice or cubes. A slice of lemon will garnish the tea.

Soldiers Stayed in France Over Thousand Americans Married And Made Home There

More than fifteen years after the end of the war, there are still about 1,100 American veterans of the World War living in France. Most of them are "voluntary exiles" for the sake of French wives. Their numbers are dwindling, however, for in 1931 they were 1,700 strong, figures given by the American Legion recently shown.

More than half live in Paris; the rest are spread over forty-nine departments.

#### Writing To Co-operate

"Women are very unreasonable," said a venerable New Hampshire justice of the peace. "I was talking over our affairs one day, and we agreed that it had come to the point where we must get along together. My dear! I said to my wife, 'we must both economize, both!' Very well, Henry," she said, with a tired air of submission, "you shave yourself, and I'll cut your hair."

Forty years in which to pay costs of the court, totaling \$750, has been given to an unsuccessful litigant, Bernard Kelly, a dock laborer in Liverpool.

#### BABY'S CRAMPS BANISHED!

"When I could not sleep at night with baby's cries, it was the little system of offending substances and remedies that helped me," said what is what Mrs. Robert Greenhorns, of New York, thinks of Baby's Own Tablets are mild and soothing in action, yet most effective. The tablets contain calamine, camphor, camomile, bellflower, resins, and small feverfew. Price 10¢.

By William E. Ladd  
**BABY'S OWN TABLETS**

#### Author Of "Beautiful Joe"

Mrs. Margaret Marshall Saunders Receives Recognition From The King

Smiling and happy at being named in the King's birthday honor last 73-year-old Miss Margaret Marshall Saunders received many congratulatory messages from friends in Canada and the United States. She was named Commander of the British Empire.

"The honor done me is as much an honor to the women members of the many clubs with which I have been connected," she said. She was born at St. John's, Newfoundland, and whose story of "Beautiful Joe," a dog, has been published in 14 languages, put into Braille and is now being translated to Japanese and Burmese. "It touches me much," she said, "that such a tribute should be given to the humane side of woman's work."

Miss Saunders, who was born at Liverpool, N.S., did her first serious writing after she was 30 years old. She was editor in a newspaper when she met her "Beautiful Joe" as a companion story to "Black Beauty," then being widely published on behalf of her human work. Her entry won the prize and her work became known throughout the world.

#### Alter Colonial Sugar Duties

##### British Divests West Indies Product Back To Canada

The British House of Commons has approved proposals contained in a white paper issued in April to alter the colonial sugar duties in such a way as to permit the flow of the commodity to Canada.

The white paper, issued when the budget came down, would send sugar back to Canada from which it was drawn when the pound sterling reached a premium in Canadian hands.

Fall in value of the Canadian dollar dislocated the sugar trade between the Dominion and the British West Indies and sent most of the commodity to the United Kingdom via the sea.

#### The New Style Bicycle

##### Velocar Allows Rider To Assume Semi-Horizontal Position

Rest when you cycle, may be the answer slogan of the Velocar, a new invention, which they call the velocar. They predict a day not far distant when the ordinary bicycle will take its place beside the bone-shaker as a rule of the past.

The velocar allows the rider to assume a horizontal position, thus making it more comfortable than the ordinary machine, and the handlebars stretch almost from the front to the back wheel.

A recent race between velocarists and cyclists in Canada resulted in an overwhelming victory for the new machine.

#### Hurricanes On The Sun

##### May Cause Draught And Dust Storms Says Veteran Student

Spurred by the recent series of dust and sand storms in the Midwest, there may be the cause of drought and dust storms in the Mid-West. These great solar storms, which appear to astronomers as mere sun spots are reaching an 11-year period of maximum intensity. Dr. C. G. Abbot of Smithsonian Institution, a long-time student of the sun and long-range weather predicting, is confident they have a great effect on weather all over the earth. And "I would not say that they have no connection with this drought in the Mid-West."

#### On the other hand the gold value of world trade again shows a decrease for the first quarter of 1934.

#### Draught And Stock Promotions

##### Government To Put Spoke In Work Of High-Pressure Salesmen

The House of Commons took the first step recently to spoke the work of high-pressure stock salesmen when it passed the Consolidated Companies Act which practically re-models the laws governing company formation.

Designed to stop fraudulent stock promotions, the bill would make it illegal to practice a pyramid scheme except through a prospectus approved by the secretary of state. Among other provisions, fines and imprisonment would be established for any house-to-house stock can-vasser or any organization that used such methods.

Penalties would range from \$500 for a first offence to \$1,000 and a year in jail for subsequent convictions.

#### Don't Read This

If you are interested in a medicine which has helped to relieve you of constipation, headache, colic, cramps, pain in the stomach, summer complaints, or any looseness of the bowels, do not waste valuable time, but get a bottle of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will relieve you of your trouble.

Do not accept a substitute. Get "Dr. Fowler's" when you ask for it, and be on the safe side.

Put up only by The T. Miltburn Co., Ltd., Toronto, Ont.

#### Martyr To Radium

##### Last Of Scientists Who Aided Mine Curie Is Dead

Henry T. Koenig, 42, a chemist of Denver, Colorado, who had worked for years under a self-imposed death sentence, died a martyr to his research work.

Koenig was the 20th to die of the 20 scientists who aided Marie Curie, discoverer of radium, in her research work.

One by one, Koenig's companions died from malignant infection induced by contact with the mineral.

But he continued his work, although he knew that each contact further weakened his system. Through his work and that of his colleagues thousands of lives have been saved.

Koenig's work in perfecting a system whereby radium extraction could be accomplished at a lower price than ever before was recognized by authorities as one of the greatest contributions to medical science.

He studied the rich radium ores of the Belgian Congo in 1922 and 1923. His development of the ore in this country is now the only danger of a mining industry.

During the World War he adapted radium to practical use in warfare. The use of radium for the illumination of watch dials at night was the result of his research.

Three months ago he was ordered to Portee's Sanitarium, suffering from cancer of the hip. Treatment failed to check the disease and he died.

#### Irrigation Plans

##### Proposal To Irrigate Large Block Of Land In Southwest Saskatchewan

Irrigation for between 5,000 and 10,000 acres in southwest Saskatchewan is proposed in a plan to be urged before the Saskatchewan government.

Facing a food shortage for the third successive year, farmers around Valmari and Cadillac ask \$100,000 expenditure to build a dam on the Frenchman river with a 15-mile main dam and south east through Footcamp.

Alitalfa would be sown with two crops a year, providing a likely crop of 25,000 tons or enough to feed 20,000 cattle.

An experimental dam is being built by George Newton to serve his farm a few miles west of Valmari.

J. R. Reid, Regina, is doing the engineering work. A small dam is being planned, the scheme finalized, and the scheme ready to supplying about 250,000 tons.

Mr. Reid said that with two crops a year about 1,250 tons of alitalfa can be grown, sufficient to feed 1,000 cattle.

#### Cana Leads The Way

##### Comes First In Industrial Recovery According to League Figures

Canada leads the way in industrial recovery.

League of Nations figures for the first quarter of 1934, compared with the first quarter of last year show these percent increases in industrial activity:

Canada, 40 per cent.; United States, 39 per cent.; Germany and Poland, 25 per cent.; Sweden, 18; Japan, 11; Norway, 6; France, 3.

Unemployment is decreasing in all the principal countries of the world except France.

Important commodities show an appreciable increase, the figures also reveal. During the first quarter of 1934, production of coal increased by 20 per cent., of gasoline 12 per cent., pig iron 31 per cent., steel 54 per cent and zinc 37 per cent, in comparison with the same period of last year.

On the other hand the gold value of world trade again shows a decrease for the first quarter of 1934.

#### Fraudulent Stock Promotions

##### Government To Put Spoke In Work Of High-Pressure Salesmen

The House of Commons took the first step recently to spoke the work of high-pressure stock salesmen when it passed the Consolidated Companies Act which practically re-models the laws governing company formation.

Designed to stop fraudulent stock promotions, the bill would make it illegal to practice a pyramid scheme except through a prospectus approved by the secretary of state.

Among other provisions, fines and imprisonment would be established for any house-to-house stock can-vasser or any organization that used such methods.

Penalties would range from \$500 for a first offence to \$1,000 and a year in jail for subsequent convictions.

#### Hero Of Russo-Japanese War

##### Admiral Togo, Who Died Recently, Was Idol Of Japanese People

Admiral Togo, who whose destruction of the Russian fleet 29 years ago placed Japan among the great powers, died at Tokyo recently.

At the age of 86 and with the rank of admiral he was the senior officer in the Japanese navy.

Admiral Togo was the oldest and most illustrious of all the heroes of the Russo-Japanese war. For several weeks he had been seriously ill. The day before he died the emperor declined to see him and he died in the rank of admiral of that of marquis. Posthumously he was promoted to admiral of the highest court rank.

It is now possible to determine the speed of lightning by use of special photographic equipment. This kind recently revealed that the average speed of lightning is around 28,500 miles per second.

Naturalists have discovered that spiders live to a ripe old age. Nevertheless their life often hangs on a thread.

Author of "Joretta's," "Lipstick  
Girl" Etc.

**SYNOPSIS**

Camilia Hoyt and Peter Anson, young and in love, marry secretly, determined to live their own lives apart until they can afford to live together. Peter is a young, struggling sculptor trying to win a competition for a sculpture to be shown at the adopted daughter of a wealthy family. His art is not to the taste of the mother who is very old and is studying commercial art in the hope of making money for her son. One day the story is Avis West, another wealthy girl who is trying to win Peter away from Camilia. Peter and Gus Matson, his former roommates with whom he has quarreled. After the wedding Camilia goes home, when the rest of the members of the party go to a cabaret to continue the party. Camilia goes to the beach by themselves and fall asleep on the sand. When they awake it is Peter and Avis. And another boy are standing near them. This makes it necessary for Camilia to announce her pregnancy and she and Peter are married. Camilia asks Peter to accept some of her savings and they leave. After Camilia had given over the savings, they and they quarrel. After Camilia has gone from the studio, Avis West comes to see Peter and asks him to accept a loan of \$1,000. Peter refuses his request, and asks Avis and Camilia to leave. They leave for it. Camilia suggests "Eager Voter" and Avis says "Invariably". Peter and the latter go to Camilia, heartbreak goes to Peter's control, and he begins to think. Peter and Avis follow him. Some lights are turned on, see the scene that has nothing to do with pleasure. Avis accuses Camilia of being a thief. Camilia, stunned by the disaster, and hurt and horrified by the accusation, faints.

(Now Go On With The Story)

CHAPTER XLVII.

The three exclamations over the discovery were almost as one breath. But the reactions of the trio were as different as the three individuals. Peter sprang toward the scattered pieces of plaster and said nothing on his knees with a groan like a great building collapsing in an earthquake. Avis' expression of horror changed suddenly to angry accusation as she turned to Camilia, who glanced perplexedly from Peter to Avis, and was on her knees beside Peter in an instant.

Their hands fumbled futilely with fragments of plaster as they would fit them together again. The two faces met each other reluctantly. For a moment they seemed to be paralyzed with the horror of this unbelievable catastrophe.

Finally Camilia faltered. "Oh, Peter darling."

Anger flamed in his eyes, just as Avis demanded in a shrill voice, "How could you?"

Camilia looked wildly from the other. "How could who?" her dry lips asked.

"You!" accused Avis. "You did it!"

Camilia put up a protest hand to push back the flame which leaped from Peter's eyes upon her, the room averted and she sank down, down into a deep black abyss. Above her, she heard voices, faintly clattering,

**Swollen Joints**

often a warning that your kidneys have become too fat. You need no doctor. Don't suffer needlessly. Take Gin Pills to obtain relief and assist your kidneys to function properly.

W. N. U. 2050

footsteps that received into stamped thuds, confusion, that seemed to pass over her head and trample her into oblivion.

Vociferous sounds, rushed back to her from a void . . . her head, where was she . . . what had happened? She tried to raise her hand, it would not move. It was too great an effort to open her eyes.

The medley of sounds resolved into distinct words. Ah! Yes, she remembered. They had found Peter's statue of Camilia and somehow, it had been too much for her. Her thoughts slipped away again. That's Avis' voice—it was Avis—decided angrily. "Of course she did it. Jealous."

That was it. Avis had accused her of being jealous. She had been jealous of Peter. Peter had looked at her as if he believed it. Peter's angry, reproachful, accusing eyes had added their pain to her first shock over the discovery, until she couldn't bear it. Her heart had been torn to pieces. She had kept her sense of self-dignity, her sense of self-respect, her sense of self-defended herself against them. Why had she accused her, she wondered for a bewildered second. Oh, yes, she had been alone in Peter's room, in the dark, when he and Avis came in and discovered the broken figure.

She moved her hands protectively, opened her eyes. Cathie was bending over her. Terry was beside her. Just let her rest. Don't try to talk to her."

Camilia was grateful for that advice. She wished they all would leave her alone, and decided to be very quiet until they did. But just then a sharp, agonizing pain struck her. If Peter were nearby to believe that Camilia had done this despicable thing to him, it was the end for him. He never would accept for his wife such a woman as Cathie.

"She's all right now," Cathie pronounced.

"Leave her alone. She can't help it."

Terry said, "She'll be all right, now. Just let her rest. Don't try to talk to her."

Camilia was grateful for that advice. She wished they all would leave her alone, and decided to be very quiet until they did. But just then a sharp, agonizing pain struck her. If Peter were nearby to believe that Camilia had done this despicable thing to him, it was the end for him. He never would accept for his wife such a woman as Cathie.

"She's all right now," Cathie pronounced.

"Leave her alone. She can't help it."

Terry said, "She'll be all right, now. Just let her rest. Don't try to talk to her."

### Nasty Accident

#### At Thigh Hill

A nasty accident occurred on Thigh Hill on Tuesday evening, when a car bearing five passengers, owned by Rev. McInnis of Iron Springs, turned over. I. Granlin of the Granlin Motors, Champion, rushed to their aid and found two women passengers, Mrs. McInnis, mother of Rev. McInnis and Mrs. McMillan severely injured. They were taken to the Vulcan hospital, where it was found that Mrs. McMillan, besides severe face injuries, was hurt through the back and shoulders. Mrs. McInnis was also suffering from back and shoulder injuries. Whether there are any internal injuries remains to be seen. Both patients are reported to be in a favorable condition. Other passengers were not injured. The party was returning from Banff, where they had attended the Oxford Group gathering.

### Tennis Tournament Big Success

On Sunday, June 10, the Champion Tennis Club competed in a tournament with Vulcan Tennis Club. Play began at 2 o'clock in the afternoon and continued until after 8:30 in the evening. The weather was of the very best and some very good tennis was witnessed. A lunch was served by the Ladies of the Vulcan club at six o'clock, being thoroughly enjoyed.

There were no singles played, it being comprised of 200 games of doubles. Vulcan was up 8 points at the finish making Vulcan 134 games to Champion's 126. This was a very close score which indicates the teams are very evenly matched.

Vulcan will return to Champion June 24th. All those wanting to play hand your fees in to the secretary if you have not already done so. The tennis club would like anyone who wants to join now and be in practice for the tournament with Vulcan. A good turnout would be appreciated in the evenings at the tennis court.

### Sun Spots and The Weather

There is a lot of talk these days about sun spots and their influence on the weather, following prediction by astronomers of dire floods throughout the world between 1935 and 1936, and this because of the sun's spot record. J. H. Kincer, of United States Weather Bureau, said thereto nothing in the cycle idea. He points out that there are at least 138 of these so-called sun spots recorded in the sun's course, with very short periods up to 200 years and are supposed to be associated not only with sun spots and floods but tree rings, earthquakes, wheat prices, lake levels, the position of the planets, sunspots, and other astronomical data forth. According to Kincer the cold facts so far developed show conclusively that no one weather cycle, aside from the sunspot record, can be any general bearing whatever as a means of long-range weather forecasting. Mr. Kincer selected the 11, 23 and 35-year cycles and showed how they worked in practice. The demonstration was based on the fact that all but a few of any predictions at all would have been just as right if he merely uttered whatever came into his head about the weather at widely separated stations.

The fourth annual basket picnic and Field Day of the Avondale Shorthorn Club will be held at the E. P. Ranch, west of High River, on Saturday, June 16th. A cordial invitation is extended to all. A special effort is being made to provide a good time. Interesting speakers, inspection of Livestock, judging and games for the children will be included in the program. Come and bring your friends for a day's outing at this beautiful ranch.

Champion, challenging, defeated Vulcan at a duplicate game of bridge in the Savoy hotel, Champion, during the week end. B. E. Cool arranged the duplicate board and supervised the play. The visiting team was composed of Dr. Carson, W. McFarland, H. Dorte, J. Dorte, L. Jones, and Mr. Fitzpatrick. The hosts included Messrs. Cemmlin, P. Patterson, Dr. Hoal, G. Depue, W. Bozarth, F. Clever, M. E. Hamilton, G. Marks, J. Kulpas, J. Doyle, B. F. Cool and N. A. Cool. At midnight a lunch was served by Mrs. Cemmlin.

Little Miss Audrey Harris suffered severe burns to the feet, when she walked through some ashes which contained live coals. Medical aid was given and she is progressing favorably.

Cultivator shovels pointed to look like new.

Hand made chisels and punches for sale.

### Keeping Up Quality

The reputation of Canadian wheat on the markets of the world is due to the efforts western farmers have made to keep up the quality of their production.

And the reputation of United Grain Growers is similarly based on unremitting efforts to keep up the quality of its service to farmers in handling their grain and furnishing them with farm supplies.
